

LUIS TORO

JUNIOR WEB DEVELOPER

Graduated from a Coding Traineeship as a Full Stack Developer including completing 2 real-world projects successfully to specification. I also previously completed a Front-End Web Developer Nanodegree program. I am strongly committed to learning and changing my career, with a variety of transferable skills combined with a university background in Architecture & Design which makes me a good problem-solver.

DEVELOPMENT EXPERIENCE

GAZETTEER

IT Career Switch Project #1

JavaScript - PHP - AJAX - APIs

The specification was to reply to a website specification for a map-based app to provide information on countries – with a focus on a “mobile first” development. Preferably using a framework, to then develop HTML, CSS and JavaScript with jQuery modules that use PHP server-based components to source data from third party APIs (Geonames, Open-Weather). The solution is assessed on its delivery to specification, functionality, and usability.

COMPANY DIRECTORY

IT Career Switch Project #2

JavaScript - PHP - MySQL - AJAX

A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing to develop a “mobile-first” application to maintain a company personnel database (MySQL). Sign off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system's ability to perform error free.

PHP LARAVEL 8 DASHBOARD

Personal Project

JavaScript - PHP Laravel - jQuery

A full-stack PHP Laravel 8 application project that allows user to control create, read, update and delete (CRUD) frontend content through an authentication system dashboard by using MVC architectural pattern.

REACT NATIVE RESTAURANT LIST

Personal Project

JavaScript - React Native - Firebase

A React Native mobile application project that allows all users to view a restaurants list. See top Restaurants based on reviews. Search for a restaurant. Add to favourite, rate and comment on restaurants (Only logged users)

MEMORY GAME

Udacity Project

HTML - CSS Bootstrap - JavaScript -

Classic memory game project where user is given a deck of 8 pairs of cards where users has to try to discover the pairs in the least possible time.

User will be rate by stars depending the amount of moves player had taken to show all cards. The more moves the player take, more stars will be taken away.
